SUMMARY

Highly skilled Mobile and Web Application Developer with 5+ years of experience in building scalable, high-performance applications using React.js and React Native. Experienced in leading teams, mentoring developers, and delivering responsive web and mobile solutions. Passionate about UI/UX optimization, performance enhancement, and staying updated with industry trends.

EDUCATION

Gujarat Technological University | Surat, GJ Aug 2016 - May 2020
Bachelor in Computer engineering - 8.3 CGPA

WORK EXPERIENCE

PwC Acceleration Center, Bengaluru Apr 2025 - Present
Senior Associate - Salesforce Practice

- Architected and implemented seamless integration between **React Native** frontends and **Salesforce** backend systems, streamlining user authentication, **secure data exchange**, and real-time synchronization.
- Collaborated across **multiple Scrum** teams within a **single project environment** to facilitate efficient code sharing, aligning development practices and ensuring consistent implementation of features and backend integration.
- Utilized **Azure DevOps** for comprehensive project management, agile sprint planning, and version control, enabling transparent tracking of user stories, tasks, and progress across multiple Scrum teams.
- Collaborated directly with **client stakeholders** during **Program Increment Planning** to define program backlogs, clarify feature requirements, and establish deliverable scope for mobile applications using React Native and Salesforce backends.
- Mentored junior developers on best practices for React Native–Salesforce integration, **modular code architecture**, and data governance, elevating overall project quality and maintainability.

Thinkbridge Software Pvt. Ltd, Pune Feb 2022 - Apr 2025
Software Engineer - Service Delivery

- Experienced **Module Lead** skilled in leading cross-functional teams, using technologies like **React** and **React Native** to develop and enhance **mobile** and **web application** features for **high-traffic applications**, improving scalability and performance for over **100K** users.
- Responsible for designing and developing advanced **UI components** such as tab bars, map views, image pickers, date pickers, **push notifications**, and sign-in/out features in React Native, alongside seamless integration with Rest API backends, reducing development time by **30%**.
- Actively collaborated with **cross-functional teams** using Figma to refine UI/UX designs, ensuring superior user experience and web platform accessibility.
- **Mentored junior developers**, enhancing team capabilities and fostering a collaborative environment focused on knowledge sharing and best practices to elevate **code quality** and **maintainability**.
- Implemented innovative technologies and methodologies to advance app functionality and **optimize user engagement**, contributing to project delivery within scope and timelines.
- Analyzed web performance metrics and implemented optimizations, leading to a **25%** improvement in page load speed.

React Native Developer

- Proficient in configuring and managing React Native **boilerplate**, streamlining the development process and ensuring a robust foundation for building scalable and efficient mobile applications.
- Demonstrated expertise in **client communication**, effectively liaising with stakeholders to gather requirements, provide updates, and ensure alignment with project goals, resulting in enhanced **client satisfaction** and **project success**.
- **Led a team** in the development of a social networking application, overseeing the project from conception to launch, ensuring adherence to timelines and quality standards, and resulting in a robust, user-engaging application.
- Gained hands-on experience with Firebase products, utilizing **Crashlytics** for bug identification and resolution, implementing **chat modules** with Realtime Database, and enhancing app security with **Firebase Authentication**.

DayDreamSoft LLP, Surat

Oct 2019 - Mar 2021

Jr. React Native Developer

- Acquired fundamental skills in mobile app development, mastering JavaScript and **object-oriented programming (OOP)** to enhance software solutions.
- Gained experience across all phases of the **software development lifecycle**, including requirement analysis, implementation, and time estimation, ensuring projects meet designated timelines.
- Developed strong interpersonal, communication, **time management**, and **team collaboration** skills, with a proven ability to meet project deadlines in high-pressure environments.

PROJECTS

Savvy

- Collaborated closely with the **Orderade Scrum** team to design, implement, and optimize the core module for efficient order management—streamlining the end-to-end process from store visit to final conversion and merchandising activities.
- Developed end-to-end functionality for **Work Order management**, enabling Pre-Sales Representatives to efficiently generate, edit, and duplicate work orders for field activities such as store visits, merchandising, or follow-up tasks.
- Utilized Salesforce "**Soup**" (local smart database) to efficiently cache and store key business data—including work orders, store info, and order rules—on the device, supporting **real-time, offline access** and seamless user experience even with intermittent connectivity.
- Designed and implemented map visualization for PSR routes, displaying numbered store markers in optimized visit order with color-coding to instantly indicate started, non-started, and completed visits.
- Implemented **UPC barcode** scanning capabilities using high-performance React Native camera and barcode scanner libraries, allowing field users to quickly scan and validate product barcodes during order processing.

Prepaid

- Prepaid offers **Visa** and **Mastercard Programs** that are FDIC Insured and meet all with all the applicable regulations.
- Optimised **security** by adding extra layer of validation using **Cloudflare** and **google captcha**.
- Implemented most advance user engagement sdk called **Clevertap** which use customer data to analyze for better experience and optimization, personalization and to perform **customer engagement** activity.
- Experienced in integrating and customizing payment SDK called **Readyremit** for seamless and secure **online transactions**. In addition, utilized JavaScript and RESTful APIs to integrate the **PayPal SDK** for cross platform payment processing.
- Enhance user convenience by securely storing login credential using **keychain** access.
- Allow instant updates without requiring user to download new app version using **code push**.
- Experience in customizing and **white labeling** mobile applications for diverse clients to meet their branding and business needs.

SoLit

- SoLit is a **mobile application** which can be used for the planning one/more day trips including stop details. User can share trips with others also they can **communicate** with each other, follow/unfollow etc.
- Implemented **social media** login functionality to allow users to sign in with their existing social media accounts for a seamless onboarding experience.
- Developed a feature for users to select their interests, such as travel destinations, activities, and preferences, to **personalize** their **app experience**.
- Designed and implemented an exploration feature that allows users to discover content and feeds from other travelers and like-minded individuals.
- Implemented the ability for users to add desired stops or locations within their trip itinerary, including attractions, hotels, and restaurants.
- Integrated a **chatbot** or **messaging functionality**, allowing users to interact with the app for recommendations, and travel-related inquiries.
- Created a system for users to like, assistance, comment on, and review trip itineraries, destinations, and other users' content, enhancing user engagement and **social interaction**.

Instant-Delivery

- Instant-Delivery is a mobile application which can be used for the deliver things from one place to another place.
- Developed a dedicated app for drivers and connecting them with delivery requests.
- Implemented a users to efficiently deliver items from one location to another, bidding system, allowing drivers to bid on delivery rates for specific requests, creating a competitive marketplace for delivery services.
- Integrated a chat module for **real-time communication** between drivers and users, enabling discussions on delivery details and addressing queries.
- Created **live location tracking** functionality for users and drivers to monitor the real-time progress of deliveries and ensure transparency.
- Designed a review system that allows users to rate and provide feedback on the performance of drivers, ensuring accountability and quality service.

ADDITIONAL INFORMATION

- **Programing Languages:** Javascript | typescript | C
- **Frontend Technologies:** React Native | React.js | HTML | CSS | Tailwind | Bootstrap
- **Database Technology:** Realm | Firebase
- **Software and Tools:** Visual Studio code | Android Studio | X code | Git | Figma | Postman | XD | Browser stack | Bitbucket | Atlassian tools (Jira, Confluence)
- **Cloud Platform:** AWS
- **Operating Systems:** MacOS | Windows | Linux
- **Other Skills:** Mobile application Development | Web development | UI/UX Design | CI/CD Pipeline
